

CLOCK SK-T008 *Thermometer*

15CM DISTANCE

CLOC SK – T008

MEDICAL GRADE INFRARED THERMOMETER

This model uses a 9 volt battery as opposed to most other models that use two x AAA batteries. (3v) the additional voltage allows for scanning from up to 15cm. (150mm)

An added feature is the operating environment scanning range.

The T008 can scan in environments ranging from 10 C – 40 C.

The CLOC Non-Contact Digital Infrared Thermometer SK-T008 provides high-precision and accurate temperature readings.

No-contact and hygienic temperature measurement

LCD display with back-light for dark conditions

Uses infrared technology

Auto power off

The CLOC Non-Contact Digital Infrared Thermometer SK-T008 will sound an alarm for the upper and lower temperature limit to help identify abnormalities or fevers.

This product requires a single 9V battery to operate. (Not supplied)
